

SUNGOLD

CHERRY TOMATOES

Planting

It's not uncommon for these tomato plants to reach up to 8 feet tall, so be sure to stake them using the tallest tomato cage you can find and plant away from windy areas if possible.

Picking

Pick the tomatoes when they are a bright orange color. Don't let them stay on the vine too long, the skin of the tomato will burst and won't store as long!

Storing

Be sure to remove the green stem from each tomato when storing so it doesn't puncture other tomatoes. Keep these beauties at room temperature in a shallow bowl.

Fun Fact!

Don't let the small size of the Sungold tomatoes fool you, the plant itself can mature to be quite large and holds the current world record for the tallest tomato plant ever grown, reaching almost 63 feet in height!

Keep it simple

Sungold cherry tomatoes are best suited for raw applications. Their distinct, tangy-sweet flavor is showcased when consumed fresh like in salads, skewers and fresh salsa!

We like pairing Sungold tomatoes with other fresh veggies like in the recipe below!

Rainbow Summer Salad

Ingredients:

2 cans corn, *drained*
1 cup chopped purple cabbage
1-2 cups cherry tomatoes, *quartered*
2 green onions, *thinly sliced*
1 orange or red bell pepper, *chopped small*
1 can white beans, *dried and rinsed*

Directions:

1. In a large bowl, combine all of the ingredients and stir well until everything is well combined
2. Serve immediately and refrigerate any leftovers
